Cara Setup Sistem (PHP) Localhost

[Setting Source Code]

Extract semua file XXX.zip ke dalam folder

C:\xampp\htdocs\xxx\

[Setting Database]

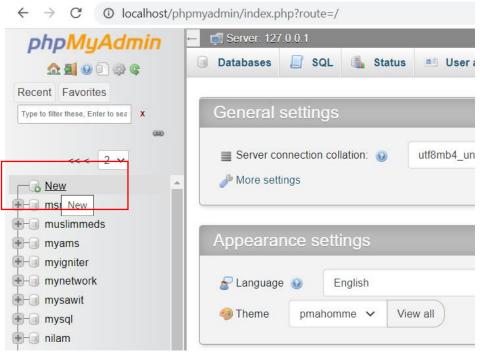

Run XAMPP Control Panel

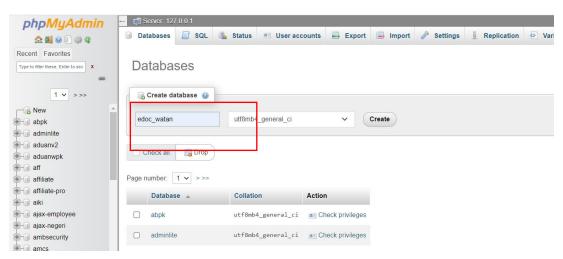

Pastikan kedua-dua Apache & MySQL dlm mode **START** (hanya start jika nak pakai sistem shj)

Kalau dah tak pakai sistem / sebelum tutup pc.. pastikan keduadua **STOP**.

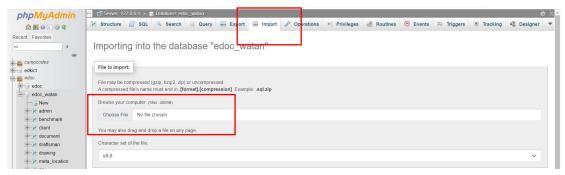

Buka web browser (chrome) tiapkan url http://localhost/phpmyadmin

Klik pada **New**

Masukkan nama database 'xxx' dan tekan butang Create

Tab: Import

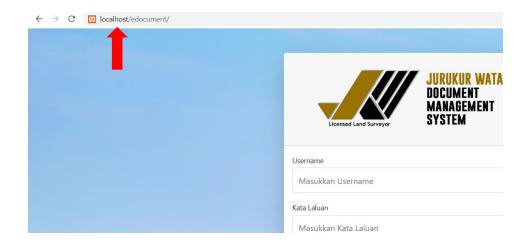

Choose file: xxx.sql dan klik butang Import

Selesai!

[RUN SISTEM]

Untuk run sistem
Buka Web Browser (**Chrome**)

Taip pada url: http://localhost/xxx/

#nota: Setiap kali nak buka sistem MESTI start xampp.
